In a Main Entry in the Author Index, in brackets [ ] following the title, are listed references to information in the article not named in or implied by the title. All references in the Subject Index are to this Main Entry so that a person looking up any one reference to an article is led at once to all the indexed information.

In the Subject Index asterisks (*) indicate that an article deals with a subject at length.

Words in parentheses ( ) distinguish between articles written by the same author.
